

ARC-1883X Dual Port Connection Model

Wide Port Connection

Dual-domain SAS for Dual Path Connection

Dual Path for Failover

The JBOD has dual expanders which allow effective failover and recovery using ARC-1883X dual path function.

- (1). ARC-1883x dual ports connect to the JBOD as the above picture.
- (2). If the expander or data path in one path fails, the system automatically switches to other path.
