# Areca ARC-CD2I

Internal Mounting Caddy for the Mac Pro

The Areca ARC-CD2I is an internal mounting caddy for the Mac Pro, but connects over SATA to Mac Pro or SAS/SATA port to ARC-1886-6N8I RAID adapter. It also includes the necessary cable to connect the drives to internal ports of the Mac Pro or ARC-1886-6N8I and 10-pin power connector to the Mac Pro logic board. Please view the following steps below to install your ARC-CD2I will fit in your Mac Pro 2019. Before installing the ARC-CD2I, there is a retainer plate that needs removal prior to installation.

clamp plate

ARC-CD2I

Step 1: Unpack

Checklist

- 1 x internal SATA to SATA cable
- 1 x ARC-CD2I mounting caddy
- 1 x ARC-CD2I quick installation guide

Step 2:

• For Mac Pro SATA Port:

Insert the *SATA & 10-pin Power cable connectors* into the logic board of the machine.

• For ARC-1886-6N2I SAS/SATA Port:

- Insert *SATA cable connectors* into the ARC-1886-6N2I SAS/SATA port.
- Insert *10-pin Power cable connector* into the logic board of the machine.

Step 3:
Slide the drive into ARC-CD2I, and secure it down with four screws for each drive. The PCB side has to face up.

Step 4:
Remove a single clamp plate at the top of the Mac Pro via a T8 torx bit

Step 5:
Slide the ARC-CD2I in along the slot and secure the clamp plate.

Step 6:
Insert the SATA connectors into HDD connector
